Installation Instructions >> Short Skid Plate >> Africa Twin 1000

- 1. After removing the factory skid plate, proceed with removing the bolt in the middle of the skid plate mount using a 12mm socket and ratchet. Ratchet extension is optional.
- 2. Take the supplied skid plate mount cross brace and place it on the frame underneath the engine.

COLUTIBIFACIA (NCOTICIRATEIA

- 3. Line it up with the mounting hole in the center or the factory skid plate mount. Re-insert the factory bolt by hand-threading it.
- Tip: leave this bracket loose, it will help you lining up the mounting holes.

4. Remove the factory metal clips and spacers.

3.

COLUTIBACIS (NCOTICIETEIS

- 5. Mount the supplied rubber insert inside the factory rubber isolators. Both sides.
- 6. Secure both rubber inserts using the supplied clips.

4

Installation Instructions >> Short Skid Plate >> Africa Twin 1000

7. Mount the skid plate and line up the front mounting holes. Insert and first hand-thread the M8x16mm Allen bolts+washers. Do not tighten it, yet.

Note: thread-locking liquid is recommended.

8. Insert and hand-thread the M8x12 mm Allen bolts after lining up the rear mouting holes.

Note: thread-locking liquid is recommended.

7. Finally, go ahead and tighten all the bolts and nuts to the required torque specs and make sure to check again after going out for a test ride.

Congratulations! You've completed installing your Outback Motortek product.
